Sharjah, United Arab Emirates | UAE resident — available immediately

PROFESSIONAL SUMMARY

Electronics and Computer Engineering graduate with hands-on experience building AI/ML pipelines, automating data workflows, and communicating insights to senior stakeholders. Holds an Investment Banking Operations certification with domain knowledge in financial markets, AML/KYC, and trade lifecycle. Published researcher (IEEE Access, Taylor & Francis). UAE resident, available immediately. Looking to channel technical depth, analytical rigour, and cross-functional communication into a product management career.

CORE COMPETENCIES

Product Roadmapping

PRD Writing

Agile / Scrum

Data-Driven Decision Making

Stakeholder Management

Market & Competitive Analysis

ML / AI Pipelines

Python & SQL

Power BI

AML / KYC

Trade Life Cycle

Cross-functional Collaboration

EXPERIENCE

Regal Rexnord Corporation

May 2024 – Apr 2025

Data Scientist Trainee · Hyderabad, India

- Built MLOps pipelines for sales forecasting across multiple business units using an ensemble-weighted approach combining several models — delivered end-to-end from data ingestion to production deployment.
- Designed an automated pipeline in Python integrating the OpenAI API to extract insights from sales data, generate visualisations, and produce executive-level PowerPoint reports — eliminating manual reporting effort for senior stakeholders.
- Developed a computer vision model to detect and classify PPE for factory safety compliance; led requirements gathering and cross-team delivery across engineering and operations.

Helyxon Healthcare Solutions

Jun 2023 – Aug 2023

Data Analytics Intern · Chennai, India

- Contributed to an OCR pipeline for classifying medical insurance forms using pytesseract.
- Built a Power BI dashboard visualising neonatal fatality metrics across Tamil Nadu districts; presented findings to executive reviewers, translating raw data into actionable recommendations.

PROJECTS

Smoothest Path Algorithm for Train Tracks

Python · ArcGIS

Terrain-aware path optimisation model using a modified Dijkstra's algorithm with DEM inputs — improved route realism and smoothness for railway planning.

Diabetic Retinopathy Detection

Java · Android Studio · TensorFlow

CNN-based classifier for five stages of diabetic retinopathy using transfer learning on fundus images. Includes preprocessing and augmentation pipelines; delivered as a working Android app.

Deep Learning Based CAPTCHA Solver

Python · LSTM

Research project exploring LSTM-based sequence models to demonstrate potential CAPTCHA vulnerabilities. Documented limitations and ethical considerations (defensive/research use only).

EDUCATION

B.Tech, Electronics and Computer Engineering — Vellore Institute of Technology	2020 – 2024
Chennai, Tamil Nadu	
Indian School Certificate — Holy Angels ISC School	2018 – 2020
Thiruvananthapuram, Kerala	

RESEARCH & PUBLICATIONS

Estimation of Essential Battery State Parameters for BMS in Electric Vehicles
IEEE Access, Aug 2025 — Time-series battery state estimation using LSTM and Extended Kalman Filter.
Design and Development of 2D Space Shooter & Arcade Game Using Unity
Taylor & Francis — Machine Learning Hybridization and Optimization for Intelligent Applications, Oct 2024.

CERTIFICATIONS

Certified Investment Banking Operations Professional (CIBOP) — Imarticus Learning	May 2025
---	----------

SKILLS

Programming & Data	Python, Java, SQL, HTML/CSS
Data & BI Tools	MySQL, Databricks, Snowflake, Microsoft Excel, Power BI, ArcGIS
ML / AI Libraries	NumPy, Pandas, TensorFlow, Keras, YOLO, Plotly, Seaborn, BeautifulSoup4, Dash
Product & Analytics	Product Roadmapping, PRD Writing, User Story Mapping, A/B Testing, KPI Definition, Market & Competitive Analysis, Stakeholder Management
Methodologies	Agile, Scrum, Cross-functional Collaboration, Requirements Gathering, Root Cause Analysis
Finance & Operations	Financial Markets, Financial Instruments, AML/KYC, Trade Life Cycle, Corporate Actions, Collateral Management, Transaction Monitoring
